

DH500R REAR FOLD-OUT DOUBLE STEP

Step Operation

The Stayco DH500R rear door fold-out double step has been specifically designed to work with high floored utility vehicles such as the Iveco Daily and other all wheel drive vans. A two tread step access compared to a single fixed tread makes all the difference when entering or alighting from these vehicles. The DH500R is only 500mm wide. If it is mounted on one side of the rear access of the van, it will clear any centrally mounted tow bars and hooks when deployed. Deployment of these steps can be a requirement of health and safety, and if so, they can easily be mounted in such a way that without deploying them, easy access through the doorway can be denied to the operator.

Dimensions

Tread width: 500mm
Step raiser heights: 266mm
Floor heights: 700mm – 850mm

Weight

20kgs

Standard Equipment

Annodised aluminium extruded treads
Annodised aluminium side arms and links
Nylon joint bearings
Galvanised steel top plate
Highlighted rubber top tread grip strip
8mm steel floor mounting plates
Grab handle

Warranty

12 months

The Company has a policy of continual improvement and reserves the right to change the product specifications without notice
